Why CANTUS FUNGICIDE makes sense
CANTUS is an Early blight specialist and can be used with any protectant fungicides for a complete disease management program.

CANTUS:
- The Early blight & Botrytis specialist.
- Systemic & rapidly to ensure long-lasting control under adverse conditions.
- Registered on over 60 crops in Canada and the USA.

How CANTUS works
CANTUS works by preventing spore germination, mycelia growth and sporulation. Optimum performance is obtained when used in a regularly scheduled preventative spray program.

How to use CANTUS
- Begin applications of CANTUS prior to the development of Early blight.
- Early blight: 175-315 g/ha on a 7-10 day interval.
- Botrytis grey mould: 420 g/ha followed by a second application after 7-10 days.
- Do NOT apply more than two sequential applications of CANTUS before alternating to a fungicide with a different mode of action for at least one application.

Technical Information
- Fungicide Group: 7
- Active Ingredient: Boscalid
- Interval: 7-10 days
- Rainfast: 1 hour
- REI: 12 hours
- PHI: 0 days
- Formulation: Wettable granule
- Packaging: 1 case consists of 4 x 2.83 kg jugs
