

## The Advanced Weed Control program for canola.

The Advanced Weed Control (AWC) program is a complete weed management strategy, developed to tackle your specific weed challenges.<sup>1</sup> AWC combines a resistance management approach with effective herbicides. Backed by the Performance Support Guarantee, our team will go the extra mile to earn your trust and help you achieve weed-free fields.

### We're not done until your weeds are.

The benefits of the AWC program:

#### Cleaner fields.

Dependable herbicides combined with a weed management strategy provides improved control of labelled weeds, including resistant biotypes. And customized solutions provide flexibility to manage the specific challenges of any given field.

#### Resistance management.

Providing numerous herbicide options with multiple modes of action contributes to the long-term success of growers' operations.

#### Performance Support Guarantee.

You can enjoy the peace of mind that comes with hassle-free support in the unlikely event of weed escapes.<sup>2</sup> That even includes resistant biotypes, wild oats, kochia, cleavers and flushing weeds.<sup>1</sup> Eligible growers can receive up to 100% of the BASF respray purchase value<sup>3</sup> to correct the specific weed problem in each field.

<sup>1</sup> When adhering to specified rates outlined in the product label for the weeds outlined in the program.

<sup>2</sup> When recommended products are used up to labelled rates.

<sup>3</sup> Calculated at the Suggested Retail Price (SRP).

# Customized solutions for any weed challenge.

1. Identify your weed challenges. 2. Customize your herbicide solution.

## CANOLA

### KEY WEEDS CONTROLLED

(incl. resistant biotypes)

#### Kochia

#### Volunteer canola

### RECOMMENDED SOLUTION

Pre-Seed

**Certitude**<sup>®</sup> **FOLLOWED BY**

Herbicide

40 acres/case

In-Crop

**Liberty**<sup>®</sup> **150 SN**

Herbicide

1.35 L/acre or higher<sup>1</sup>

#### Grassy weeds<sup>2</sup>

Foxtail barley<sup>3</sup>  
Green and yellow foxtail  
Quackgrass  
Volunteer cereals  
Wild oats

#### Broadleaf weeds<sup>2</sup>

Chickweed  
Dandelion  
Flixweed  
Hemp-nettle  
Lamb's quarters  
Redroot pigweed  
Round-leaved mallow  
Shepherd's-purse  
Stinkweed  
Volunteer flax  
Wild buckwheat  
Wild mustard

In-Crop

**Liberty**<sup>®</sup> **150 SN** + **Centurion**<sup>®</sup> **ADV**

Herbicide

1.35 L/acre or higher<sup>1</sup>

Herbicide

80 acres/case

#### Cleavers

In-Crop

**Liberty**<sup>®</sup> **150 SN** + **Facet**<sup>®</sup> **L**

Herbicide

1.35 L/acre or higher<sup>1</sup>

Herbicide

160 acres/case

For in-crop applications, an optional tank mix of Liberty<sup>®</sup> 150 + Facet<sup>®</sup> L + Centurion<sup>®</sup> ADV herbicides can be used if you have a range of challenging weeds, including cleavers.

<sup>1</sup> Do not exceed maximum label rates for Liberty 150 herbicide per season.

<sup>2</sup> Refer to Centurion ADV and Liberty 150 herbicide labels for full list of covered weeds and specific application timing.

<sup>3</sup> 40 acres/case rate of Centurion ADV is recommended for improved control of foxtail barley.

## Navigate AWC solutions with our helpful resources.

If you need assistance on choosing a solution to manage specific weeds concerns, we've got options. Our AWC decision trees, available at [agsolutions.ca/awcdecisiontree](https://agsolutions.ca/awcdecisiontree), allow you to discover weed management options based on your soil zone and/or operation needs. You can also build your customized AWC solution with the herbicide solutions tool at [agsolutions.ca/advancedweedcontrol](https://agsolutions.ca/advancedweedcontrol).

## More info on Advanced Weed Control for canola.

### Do I need to use Certitude® herbicide (pre-seed) in order to participate in Advanced Weed Control?

Certitude is not a requirement to participate in Advanced Weed Control for canola unless you are targeting kochia and/or volunteer canola. Certitude (+ glyphosate) followed by Liberty 150 combines Groups 6, 9, 10 and 27 to achieve consistent industry-leading control of kochia and volunteer canola. *Please refer to the Pre-Seed Burndown Application for Canola AWC Decision Tree for additional guidance.*

### Do I need to use Liberty 150 at the 1.62 L/ac rate to qualify for the AWC program?

Liberty 150 needs to be applied at the 1.35 L/ac rate or higher to qualify. The 1.62 L/ac rate is recommended to achieve the most effective control of your most common weeds. The effectiveness of this rate will help you achieve cleaner fields and manage resistance. Ask your BASF **AgSolutions**® Grower Representative before application to match your rate to the label restrictions for your weed spectrum and staging, and to align with your expectations. *Please refer to the In-Crop Herbicide Application for Canola AWC Decision Tree for additional guidance.*

---

## Proven strategies to tackle your biggest weed challenges.

**Kochia:** A two-pass approach is the most effective way to manage this challenging weed. Hit kochia early with a pre-seed burndown application of Certitude plus glyphosate to get ahead of its sizing and clean it up with Liberty 150 in-crop. A combination so powerful, BASF guarantees its performance.

**Cleavers:** An in-crop application of Facet L tank mixed with Liberty 150 controls cleavers up to 6 whorls quickly and effectively to protect the yield and quality of your InVigor® hybrid canola.

**Wild oats resistant to Group 1 chemistries:** Combining Liberty 150 with Centurion ADV for an in-crop application provides a multi-mode of action solution to this increasing weed challenge.

Talk to your BASF **AgSolutions** Grower Representative for further details on these specific weeds or other weed challenges you may face in your fields.

# Our products are backed by our Performance Support Guarantee

Your product experience matters to us, and we stand behind the performance of every BASF herbicide. If you experience any issues, we want to know so we can work together to resolve it.

## How to register a claim.

1. Visit [agsolutions.ca](https://agsolutions.ca) to complete a BASF Ag Product Assurance checklist to ensure you have the information needed to submit a claim before phoning **AgSolutions** Customer Care.

2. Call **AgSolutions** Customer Care at 1-877-371-BASF to register a Performance Support Guarantee claim and have the completed checklist handy. Depending on the issue, a BASF Grower Representative may need to visit your farm to gather more information.

3. BASF will contact the person that registered the claim once it has been fully reviewed, investigated and resolved. If you have any questions during this process, call **AgSolutions** Customer Care.

**THE ADVANCED WEED CONTROL PROGRAM ALSO PROVIDES ADDITIONAL RE-SPRAY SUPPORT IN THE UNLIKELY EVENT OF WEED ESCAPES (EVEN RESISTANT BIOTYPES).\***
