

WEED CONTROL IS YOUR GOAL. STEWARDSHIP IS YOUR PRIORITY.

There are several factors to consider when using a dicamba herbicide such as:

Nozzles – use nozzles to ensure extremely coarse to ultra-coarse droplets

Wind speed – spray when wind speeds are between 3 to 15 km/h

Ground speed – maintain sprayer speed at 25 km/h or less

Boom height – keep spray boom height no higher than 50 cm above crop canopy

Sensitive crop awareness – identify neighbouring crop species

Application volume – use a minimum spray volume of 10 GPA

Additives/adjuvants – only use as required or recommended on product label

Sprayer cleanout – triple rinse, use a detergent-based cleaner
