

Facet L herbicide

technology sheet

Superior control of cleavers in a unique liquid formulation.

- Compliments Liberty® herbicide for enhanced control of cleavers
- Widest window of crop application, from pre-seed to 6-leaf
- Easy-to-use liquid formulation
- Versatile rate range

Active ingredient

Quinclorac – Group 4 and 26

Formulation

Soluble liquid

One case contains

2 x 9.07 L jugs

Storage

Heated storage not required.
Not affected by freezing.

Crops

Canola
Wheat (spring, durum)
Barley (spring)¹
Canary seed²

Staging

pre-seed/pre-emergence to 6 leaf
1 to 5 leaf
1 to 4 leaf (prior to tillering)
3 to 5 leaf

Weeds controlled

Broadleaves

Annual sow thistle³
Cleavers⁴
Perennial sow thistle³
Volunteer flax

Staging

2 to 6 leaf
1 to 3 whorls
2 to 6 leaf
1 to 8 cm

Grasses

Barnyard grass
Green foxtail⁵

1 to 5 leaf
up to 2 tillers

Application rates

One case of Facet™ L herbicide treats 65 to 160 acres, depending on rate.

Canola	
Pre-seed/pre-emergence	227 to 279 ml/ac (560 to 690 ml/ha)
In-crop tank mix ⁶	113 to 227 ml/ac (279 to 560 ml/ha)
Barley (spring)	227 ml/ac (560 ml/ha)
Canary seed, wheat (spring, durum)	227 to 279 ml/ac (560 to 690 ml/ha)
Merge® adjuvant ⁷ (see product label)	0.5% v/v (e.g. 500 ml per 100 L spray solution)

Water volume

Ground application only 40 L/ac (10 gal/ac)

¹ To avoid crop injury, apply Facet L prior to tillering of spring barley.

² Not to be used for human consumption or fed to livestock.

³ Suppression only.

⁴ For control of secondary flushes, apply pre-seed at a higher application rate of 279 ml/ac (690 ml/ha).

⁵ For suppression of secondary flushes, use higher application rate of 227 ml/ac (560 ml/ha).

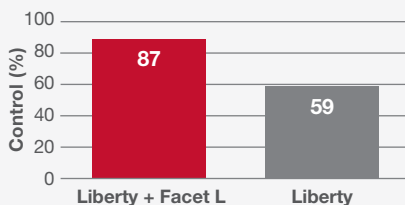

⁶ Recommended rate for all LibertyLink® varieties is 113 ml/ac (279 ml/ha) or 160 ac/case.

⁷ Merge adjuvant may be required and is not included in the case. For additional information and tank mixes, see product label.

Facet L applied in-crop

53 days after application
Source: BASF grower trials, 2018

Mixing order

1. Always start with a clean sprayer. Refer to previously applied product labels for specific cleaning instructions.
2. Fill the clean spray tank 1/2 full of water and start agitation or by-pass system. Continue agitation throughout mixing procedure.
3. **Facet L plus glyphosate pre-seed/pre-emergence:** add pH adjuster/AMS (optional), then Facet L, then glyphosate, then Merge, in sequential order.⁸
4. **LibertyLink System:** add Liberty, then Facet L, then Merge in sequential order.⁸
5. **LibertyLink System with Centurion® herbicide:** add Amigo® adjuvant, then Liberty, then Facet L, then Centurion, in sequential order.⁸
6. **Clearfield® Production System for canola:** add **Clearfield** Production System herbicide, then Facet L, then Merge, in sequential order.⁸
7. **Roundup Ready® System:** add pH adjuster/AMS (optional), then Facet L, then glyphosate, then Merge, in sequential order.⁸
8. Continue agitating while adding the remaining amount of water.

⁸ Follow labels for ingredient volumes and agitate 2 to 3 minutes between steps.

Application tips

Rainfastness – 6 hours.

Restricted entry interval – 12 hours.

Should the product freeze, warm to 5°C prior to use.

Pre-harvest interval

60 days after application for canola.

77 days after application for wheat (spring, durum) and canary seed.

80 days after application for spring barley.

Follow crops

0 months (same season)

Barley (spring), canola, wheat (spring, durum)

10 months after application

Field peas, sunflowers

12 months after application

Oats

22 months after application

Flax, lentils, soybeans

Tank mixes

Herbicide for LibertyLink canola: Liberty and Merge at 0.5% v/v
OR Liberty, Centurion⁹ and Amigo at 0.5% v/v

Herbicide for Roundup Ready canola: Glyphosate and Merge at 0.5% v/v

Herbicide for Clearfield canola: **Clearfield** Production System herbicide and Merge at 0.5% v/v

⁹ Case includes the adjuvant.
