What is ZIDUA SC?

- Zidua SC is a new, broad-spectrum herbicide for corn and soybeans, with tank-mix flexibility that provides residual activity of grassy, broadleaf and resistant weeds.

Active Ingredients

- Pyroxasulfone—Group 15

Registered Crops

- | | |
|------------------------------|--------------|
| • Herbicide-tolerant soybean | • Field corn |
|------------------------------|--------------|

Weeds Controlled

- | | |
|----------------------------------|--------------------|
| • Barnyard grass | • Ryegrass |
| • Crabgrass | • Common waterhemp |
| • Foxtail (yellow, green, giant) | • Redroot pigweed |

Application Timing

Corn: Pre-plant, pre-emergent or early post-emergent (up to 4 leaf).
Soybean: Pre-plant or pre-emergent.

Feature Benefits

- Liquid, stand-alone herbicide that offers tank-mix flexibility for multiple modes of effective action to take the pressure off a glyphosate application.
- Compatible with BASF tank-mix partners—Heat LQ, Eragon LQ, Engenia or Armezon—and glyphosate for multiple modes of effective action.
- Residual chemistry inhibits weed root and shoot growth.
