

# PROFIT FLOWS

Visit [healthierprofits.ca](http://healthierprofits.ca) for more information.

For Western Canadian canola growers looking for hybrid performance and profit potential higher than any other canola. Nexera canola hybrids offer yield potential equivalent to any competitive canola, the convenience and weed control of the Roundup Ready™ and Clearfield® systems, excellent lodging resistance for easier swathing, and excellent harvestability.

- 4M+ acres planted over last 3 years
- Excellent yield potential
- Long & mid season adaptability
- High profit potential
- Excellent standability
- Strong early season vigour
- Strong disease package (Blackleg, Clubroot)
- Easy to harvest

## Nexera Canola Hybrid characteristics

Platform	Variety	Early Season Vigour <sup>1</sup>	Days to Maturity (relative to 1012 or 2012)	Lodging <sup>2</sup>	Blackleg <sup>3</sup>	Clubroot	Pod Shatter Resistance <sup>4</sup>	Yield <sup>5</sup> (% of 1012 or 2012)
Roundup Ready	1012 RR	7	0	7	7	N	N	100%
	1020 RR <sup>6</sup>	7	-1	8	8	Y	N	107%
	1022 RR <sup>6</sup>	7	0	9	9	N	N	104%
Clearfield	2012 CL	7	0	7	6	N	N	100%
	2020 CL	7	+1	8	9	Y	N	107%
	2022 CL <sup>6</sup>	7	0	8	9	N	Y	108%

<sup>1</sup>Early Season Vigour Scale: 9 = Excellent, 5 = Average, 1 = Poor

<sup>2</sup>Lodging Scale: 9 = Excellent, 5 = Average, 1 = Poor

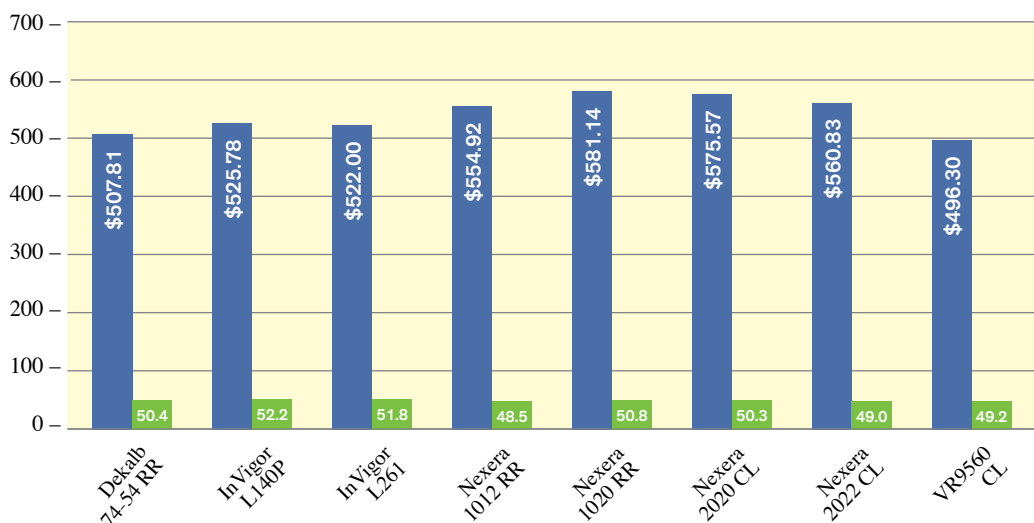

<sup>3</sup>Blackleg Scale: 9 = Strong resistance, 5 = Moderate resistance, 1 = No resistance

<sup>4</sup>Demonstrates strong pod shatter resistance and can be considered for straight cutting

<sup>5</sup>2014 small plot yield data at 60% seed color change

<sup>6</sup>Limited quantities available for 2016

## 2015 Western Canada Advanced Demonstration Trial Results\*

\*Profitability calculated at \$464.40/MT Nov 2015 Futures, a -\$20/MT commodity basis and a Contractor Nexera Canola premium of +\$40/MT (including all end use value components). 44.092 used for conversion to \$/bu.
