<sup>1</sup> For flax (*Linum usitatissimum*), use a higher rate of 600 ml/100kg seed if: a) there is a history of high disease pressures in the field, or b) where field conditions favour seed- and soil-borne pathogens. If using the 600 ml/100kg rate, it is highly recommended that the seed be treated into a bin or truck box to allow the treated seed to dry prior to placing into the seeder hopper. This will prevent clumping and bridging in the seeder.

<sup>2</sup> When applied at 1.35 L/acre rate.

## Bulk container return policy

BASF supports responsible environmental stewardship in the recycling of our bulk containers. All containers remain the property of BASF and should be returned for reuse or disposal.

- All empty containers must be returned to the BASF retailer where the purchase was made by September 30, 2019.
- A per-container deposit is required at time of invoicing for all products listed.<sup>3</sup>  
Tote deposit \$500/unit; shuttle or drum deposit \$300/unit.<sup>4</sup>
- BASF will safely dispose of all unusable containers.

<sup>3</sup> Deposit is not required for Coteegra and Insure Cereal FX4. These containers should be disposed of using CleanFarms' guidelines or returned to retailer for appropriate disposal.

<sup>4</sup> Liberty has a deposit of \$500 per tote and \$100 per drum.
