

# InVigor<sup>®</sup> RATE SEEDING RATE LBS./AC.

Identify the exact TSW on your bag of InVigor hybrid canola, choose your anticipated survivability and adjust your seeder to the lbs./ac. indicated.

SURVIVABILITY (%) 50		THOUSAND SEED WEIGHT

\* Recommended rates are based on seeding approximately 10 seeds/ft<sup>2</sup> to achieve 6 plants/ft<sup>2</sup> and assuming 60% survivability. Results may vary on your farm due to environmental factors and preferred management practices.
